TROUBLESHOOTING TIPS

Some customers experience issues with the **ROD SLIDER (J)** not sliding or getting stuck on the **GUIDING RODS (D)**. There are two possible ways to fix this issue:

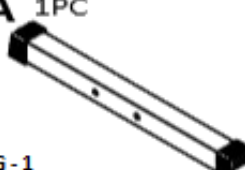

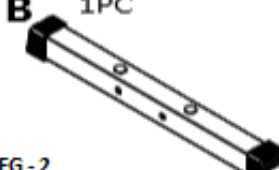

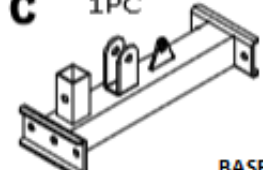

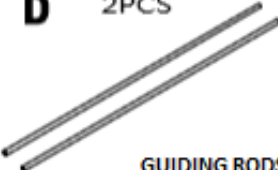

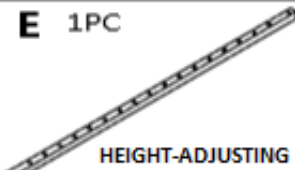

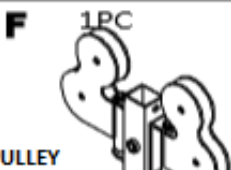

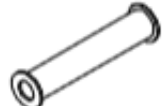

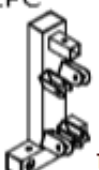

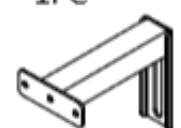

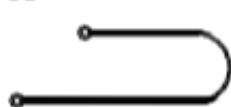

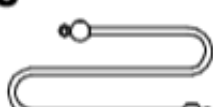

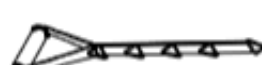

1. We recommend loosening the hardware (**1 & 5**) above and below the **GUIDING RODS (D)**, realigning the **GUIDING RODS (D)**, and tightening the hardware (**1 & 5**) above and below the **GUIDING RODS (D)**.
2. Many customers have reportedly applied a silicone-based lubricant to the **GUIDING RODS (D)** to fix the issue.

Titan recommends loosely assembling the pulley tower and tightening all applicable components once assembly has been completed.
