| (2) | ADJUSTABLE SUPPORT BRACKET | x1 |
| (3) | TOOTH BAR | x1 |
| (4) | LINCHPIN | x3 |
| (5) | LOCK PIN | x3 |

PRODUCT INFORMATION

Description:

The 32" weld on backhoe thumb from Titan Attachments is perfect for anyone that needs to add a high quality thumb to their excavator. Simply weld it to the boom and its ready for work. When not in use, you can just fold it back out of the way. Made from heavy duty 1/2" thick steel plates, this pro-duty implement is ready for just about any job. Please measure your bucket before ordering to ensure a proper match. A mismatched thumb will result in damage to your backhoe, as larger backhoes have more bucket force. For example: if you mount a 25" thumb on a hoe that requires a 31" one, you will probably bend or break your equipment. Make sure that this thumb is at least the length of your bucket when measured from boom to the teeth or the warranty may voided if damage occurs.

Features:

- Easy to assemble and weld
- Please measure your bucket before ordering
- Plasma cut for tight tolerances
- High quality steel
- Adjustable Teeth Bars
- Easily removable

Specifications:

- 1/2" tine plates, and 3/8" body assembly plates
- Tine length: 32"
- Finish: Painted
- Weight: 70 LBS

ASSEMBLY INSTRUCTIONS

- Above are two images of the 32" Backhoe Thumb Attachment.
- The image on the left shows the side where the **LOCKPINS (5)** go through the bottom of the **LINCHPINS (4)**, while the image on the right shows the side displaying the top of the **LINCHPINS (4)**.

1. Attach the **MOUNT PLATE (1)** to the **TOOTH BAR (3)** with a **LINCHPIN (4)** and **LOCK PIN (5)** as indicated in the image above.

2. As seen in the figure above, secure the **ADJUSTABLE SUPPORT BRACKET (2)** to the **MOUNT PLATE (1)** and the **TOOTH BAR (3)** with the same hardware used in the previous step.

*This concludes the
assembly of your
product.*

Enjoy!
