INFLATABLE INSTRUCTIONS

1. Before unpacking, make sure the package is intact. Take the mattress out of the box and avoid using sharp objects while offloading.
2. Remove the mattress from the sack and untie the binding bag.
3. Stretch the mattress to its full length on a flat surface.
4. Open the inflation valve anti-clockwise.
5. Press the depressurization valve and turn it anti-clockwise 45-degrees
6. Connect the air tube to the inflation valve
7. It is in fast inflation mode when connecting the other end of the air tube to the opening on the top of the pump.
8. When connecting the other end of the air tube to the opening on the bottom of the pump, it is in air sucking mode. (Need to open the valve for four seconds.)
9. Shut down the pump and disconnect the air tube when the mattress is fully inflated.
10. After disconnecting the air tube, press the valve with the finder and turn it clockwise 45-degrees until the valve is in an extruding position, which indicates the valve is shut.
11. Pump in more air after the valve is shut
12. To avoid leaking after the depressurization is put into effect, use a wrench to tighten the valve clockwise of the outer circle of the valve.
