INSTALLATION INSTRUCTIONS

STEP 1:

Figure out where you want to hang your swing and locate the ceiling joists (studs) that line up closest to the chain hole dimensions of your swing. Most ceiling joists will not line up perfectly with the swing hole points; this is normal. In other words, when the holes on the swing are spaced at 84 inches apart, the closest joists will likely be spaced at 80" or 96" apart. You can either choose to have your chain angle out, or very slightly in (neither will affect the functionality of the swing). 80" is much closer to 84", so your chain angle won't be noticeable at all.

STEP 2:

Pre-drill a hole in the center of the joist (if you have a ceiling or cannot access the joists, please contact a licensed contractor or handyman to install your hooks)

STEP 3:

Install your 2-point lag screw eyes to the ceiling.

STEP 4:

Loop the chain ends through the lag screw.

STEP 5:

Place the frame of the bed on a 5-gallon bucket to help factor in the ideal height you would like the bed to hang from. Then loop the 2 end of 2 chains into the C-Style Eye Hook at the front side, the followed by the other 2 end of chains at the backside.

STEP 6:

Place all provided cushions and pillows on the base, sit back, and relax!
