

899533 - SPITCB_AE

Counterbalance for 1" Round Spit Rod

Product Info

SLIDE LENGTH

7"

COUNTER WEIGHT

2" X 2"

COLLAR WIDTH

1"

MATERIAL

STAINLESS STEEL

PRODUCT WEIGHT

2 LB

Directions

To get started, assess the weight distribution of your spit rod. Position the spit rod inside the roaster, without attaching the motor. Rotate the spit rod half a turn in both directions several times, ensuring that the heavier side ends up at the bottom.

Next, slip the counterbalance sleeve onto the spit and secure the slide rod in the vertical position, which should be opposite to the heavier side of the spit. To achieve a better balance, move the weight along the slide closer to the spit for evenly distributed loads, and farther away for loads that are less uniform.
